

LOW DENSITY + EXCELLENT SURFACE

EYEWEAR BRAND

SUNGLASS FRAMES

AVIENT SOLUTION

Edgetek™ LD Formulation

WHY AVIENT?

- Formulated a 0.82g/cm³ density material for lightweight performance that allowed the frames to float on water even after painting
- Enabled excellent surface by addressing the typical flashing edge problems
- Delivered a paintable material to support brand identity and convey value
- Dedicated on-site support to ensure the density performance during secondary painting processing
