AVIENT SOLUTION

Cesa™ Non-PFAS Process Aid for Extrusion

WHY AVIENT?

- Provided a non-PFAS formulation that met all performance and regulatory requirements and did not interact with other additives
- Helped eliminate melt fracture with a quick time to clear of under forty minutes
- Delivered technical support, including comprehensive testing on various chemistries and polymers
- Attained high throughput with a minimal amount of additive

LEARN MORE

KEY REQUIREMENTS

- Maintain comparable performance to PFAS additives
- Meet regulatory compliance
- Eliminate melt fracture and reduce die buildup
- Increase productivity by reducing product changeover time
